GT SOFTWARES ELEVADO TECH (COIMBATORE)

ECOMMERCE :

Currently I'm doing Ecommerce project based on angular with basic layout using html & CSS for good and attractive designs and also, I'm using bootstrap framework to avoid more CSS property & responsive for mobile. In backend, SQL used for data handling and API connection is included, Python Django for Get & Post Request. This project linked in my portfolio (Work tab).

PORTFOLIO PROJECT :

My portfolio project is based on angular, with basic layout using html, CSS and bootstrap framework to improve my portfolio responsive and also I have linked my every projects and works in **dinesh.website** domain or scan QR code nearby. In this portfolio Day-to-day learnings of mine will be updated

BASIC CALCULATOR :

Basic Calculator using Angular and typescript, it is used for basic calculations like Addition, Subtraction, Multiplication, division with attractive background. This project linked in my portfolio (work tab).
